

SUNSMART POLICY

PURPOSE

The purpose of this policy is to encourage behaviours at Kiewa Valley Primary School to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

SCOPE

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

POLICY

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the SunSmart widget on the school's website, the free SunSmart app, or at sunsmart.com.au or bom.gov.au.

Kiewa Valley Primary School has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

Shade

Kiewa Valley Primary School will provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

School council approved this policy in July 2019

- Junior and Senior Playgrounds
- undercover eating area
- the canteen
- veranda areas around classrooms

When building works or grounds maintenance is conducted at Kiewa Valley Primary School that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Sun protective uniform/clothing

Kiewa Valley Primary School's school uniform and dress code includes sun-protective clothing, including:

- loose, cool, closely-woven fabric
- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts
- rash vests or t-shirts for outdoor swimming activities.

1 September to 30 April, all students and staff **must** wear a sun protective hat that shades the face, neck and ears for all outdoor activities. Hats may also be worn for all outdoor activities outside of the August to April time period, by parent or student choice.

Students are required to wear a school hat that protects the face, neck and ears when outdoors, for example 7.5cm broad-brimmed hat. Students who are not wearing appropriate protective clothing or a hat may be asked to play in the shade or in a suitable area protected from the sun as a part of our 'No Hat, No Play' policy.

Sunscreen

Kiewa Valley Primary School encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours according to [manufacturer's instructions](#).

Kiewa Valley Primary School has strategies in place to remind students to apply sunscreen before going outdoors [for example reminder notices on the loudspeaker before playtimes, sunscreen monitors, and posters about the school and at exits to classrooms.

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside.

Sunglasses

Where practical Kiewa Valley Primary School encourages students and staff engaged in outdoor activities to wear close-fitting, wrap-around sunglasses that meet the Australian Standard 1067 (Sunglasses: Category 2, 3 or 4) and cover as much of the eye area as possible.

Extreme weather Conditions

In the event of severe weather conditions or for days of temperatures over 37 degrees during school hours, children will be allowed into the school buildings, with supervision during play times (Multipurpose room/ library etc) as per the wet day timetable. This is to ensure that safe shaded and cool areas for play are provided for all students.

Curriculum

Students at our school are encouraged to make healthy choices, and are supported to understand the benefits and risks of sun exposure. Kiewa Valley Primary School will address sun and UV safety education as part of the Health & PE curriculum.

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

Engaging students, staff and families

SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school website/intranet, school assemblies, and student and teacher activities and at student enrolment/new staff orientation.

Families and staff are provided with information, ideas and practical strategies to support UV safety at school and at home. Example School may provide families and staff with information through newsletters, noticeboards, compass feeds, the school website and announcements at school assemblies.
